

## Text Samples

1 Once there was a miller who was poor, but who had a beautiful daughter. Now it happened that he had to go and speak to the king, and in order to make himself appear important he said to him, I have a daughter who can spin straw into gold.

2 Mauna Kea is in the post-shield stage of volcanic evolution, having made the transition from the shield stage before about 200,000 to 250,000 years ago. At that time, its appearance was probably quite similar to that of its neighbor Mauna Loa today, a smooth shield volcano with a large summit caldera. Following the transition, eruptions became more explosive in character, resulting in the formation of numerous overlapping cinder cones which eventually filled and completely obscured the caldera.

3 In a large skillet, saute chicken breasts in oil over medium high heat. Once breasts are browned, add white wine and salt and pepper to taste. Let simmer for 15 to 20 minutes, or until chicken is cooked through and juices run clear.

4 It was the 17th save this season for Rivera, who was touched for two bases-empty homers in his last three games against Kansas City. The best the Athletics could manage was a two-out bloop single, followed by Kurt Suzuki's game-ending fly to right.

5 In considering this question, we note at the outset that the constitutional issue before us differs in a significant respect from the constitutional issue that has been addressed by a number of other state supreme courts and intermediate appellate courts that recently have had occasion, in interpreting the applicable provisions of their respective state constitutions, to determine the validity of statutory provisions or common law rules limiting marriage to a union of a man and a woman.

6 i didnt go to school today. LAZY and TIRED and NO MOOD.i went to school in the afternoon to take UT.i did not train today. I FEEL SICK.kay done.i cant wait for school to end please. please 2nd june come quick!this is such a redundant entry. done even bother reading. aniways thanks for all the tags loves!\*hugs and love.

7 It is almost midnight, yet dozens of barges still plough the black waters of the Huangpu Jiang, hazard lights winking red and green, passing either side of streamlined robot cargo clippers that swing at anchor in the midstream channel. The tall white cylinders of the clippers' rotary sails are fitfully illuminated by fireworks bursting above a rock concert in an amphitheatre on the Pudong shore, close to the minaret of the Oriental Pearl TV Tower.

8 N epsilon-(carboxymethyl)lysine, N epsilon-(carboxymethyl)hydroxylysine, and the fluorescent cross-link pentosidine are formed by sequential glycation and oxidation reactions between reducing sugars and proteins. These compounds, termed glycoxidation products, accumulate in tissue collagen with age and at an accelerated rate in diabetes. Although glycoxidation products are present in only trace concentrations, even in diabetic collagen, studies on glycation and oxidation of model proteins in vitro suggest that these products are biomarkers of more extensive underlying glycative and oxidative damage to the protein.
